

4XEM 6-in-1 4 HDMI port USB-C Dock

4XEM Part- 4XUSBCHUB09

4XEM's USB-C Docks are designed to improve the capabilities of your single monitor displays and laptops. 4XEM's 6-in-1 4 HDMI port USB-C Dock offers a unique opportunity to vastly expand your display capabilities. Fitted with 4 HDMI ports, capable of supporting 4K video resolution, this 6-in-1 device can connect a whole host of displays into one comprehensive network. Either connect one display to two or use this device to serve as a hub to multiple displays and device. Additionally, fitted with USB-A and USB-C ports this device is also able to charge and transfer data through USB enabled device.

Problem it solves: Create a comprehensive hub for 4 HDMI enabled devices or expand your laptop or single monitor displays swiftly with 4XEM's 6-in-1 4 HDMI Port USB-C Dock.

Features:

- Detachable USB Type-C Host connector cable
- Bus Powered – USB 3.1 Gen 1 bus type
- Meets HDMI 1.4 and HDCP 1.4 industry standards
- Meets Power Delivery 2.0 standards with PD pass through – Max 100W in/55W out
- 4x HDMI 1.4 (10.2 Gbps) ports
- 1x USB 3.0 Type-A (5 Gbps) port
- 1x USB Type-C port (PD use only)
- Supports 4K UHD video
- Supports up to 4 displays (not 4K simultaneously)
- LED indicators for power and network connection
- Compatible with Windows 10 and Mac OS 11
- DP alt Mode required by host to ensure full video functionality

Application

- **Multi-Display Brilliance:** Unleash the power of 4K support across up to 4 displays simultaneously, ensuring you experience visuals in stunning clarity and detail like never before.
- **Effortless Power Delivery:** Enjoy the convenience of pass-thru power delivery, supporting up to 100W in and 55W out, ensuring efficient charging and power management for your connected devices.

Notes / Special Requirements	Requirements Notes	DP-Alt mode and USB-PD support from host required to ensure full functionality. "Adapter does NOT function as an MST hub. When multiple displays are connected simultaneously, the host OS will only recognize a single display and video output on all connected displays mirror each other. Some hardware may have specific power requirements. For example, if your laptop expects 60W of power and an adapter consumes some of the 60W, your hardware/operating system may display a ""slow charging"" message."
